

Do Our Part

Description

It's day three of my internship, and things are going well. I have my own cubicle, computer, filing cabinet AND desk! The government treats us well :)

All I'm doing now is doing preliminary research on a wide variety of topic in order to determine which will best suit the needs of this project. It's not the most exciting thing in the world, but I'm happy to do it (and get paid for it too : lol).

I had a whole bunch of funny ideas in my head of what to write in this post. But then, in my wandering of the internet, I saw this:

I really, really like that video : and not just because it has a frog in it :
And if you are curious, that is a CGI Leopard frog (*Rana pipiens*).

As many of you know, I think that the rainforests and our planet are an amazing source of biodiversity, and need to be conserved.

Do your part : recycle, be as green as is possible within your means, save energy and, most importantly, believe that we can make a difference.

Why? Well, isn't it enough I asked you?

What about the Prince of Wales?
