

David the Hero, Karma the Saviour and Sara Palin

Description

So, I got quite the response from my last blog post. Apparently, it even freaked a few people out!

Therefore, this an official statement. I AM NOT DEAD! MY HEAD DID NOT EXPLODE, I AM PERFECTLY OK. I thought you all should know ðŸ˜‰

The reason behind it was, I had a VERY bad and stress-filled Monday. So, on the walk home, I thought, "My head hurts because of all the stress. I wonder if my head could explode? Huh, thereâ€™s an idea for a blog post." And thatâ€™s it.

The rest of this week has been pretty blah, except for a few interesting tidbits.

On Wednesday, I went to the library to do some photocopying and reading for an essay. While I was photocopying, this very pretty woman beside me was having trouble with a computer terminal. She turned to me and said, "Do you know anything about computers? Iâ€™m having a terrible time here."

I crookedly smiled, and said, "I can fiddle."

She then, she explained to me her problem downloading an attachment and printing it off. I spent a minute and found her document. She looked at me with this huge look of admiration and said, "Thank you SOOO much! You literally saved my life. I donâ€™t know what I would have done."

She then smiled, a very pretty smile, gave me a hug and whispered, "Youâ€™re my hero. Iâ€™m Ariel. Thank you." And then she left.

Weird, huh?

The next interesting thing was today, when I went to the library to do some more photocopying. I had forgotten my photocopy card, so I was out of luck. And then, for some reason, a girl behind me offered me her photocopy card.

"Really? I cannot believe that you would give this to a total stranger. Iâ€™ll give it back as soon as Iâ€™m done," I said. I then ran to do my copying, and came back where she was.

"Thank you once again," I said.

"Itâ€™s good karma," she said. "Just remember, pay it forward." And then she winked and walked away.

Well what do you know, good people do exist! Theyâ€™re just exceedingly RARE.
