

The First Post or So THIS Is How It Begins

Description

Well, howdy stranger!

Welcome all to my very first blog posting. This is gonna serve primarily as a test post to see how everything works on this site. So, letâ€™s give it a go.

A friend of mine, Elisa, sent me a link for a YouTube video entitled â€œThe Most Terrifying Video Youâ€™ll Ever Seeâ€, and I was intrigued. It ends up, it is a video by a Physics/Chemistry teacher in the U.S. about Global Warming. If ANYONE you know debates with you about Global Warming and what should be done about it then show them this video. I donâ€™t care if its your friends, your parents, hell, even your toaster, show them this video. Or, better yet, show them the â€œsequel prequelâ€ video I have posted on my blog, called, â€œThis Is How It Endsâ€. What this guy did, was post a 9 minute video on YouTube, and got so many comments that he made 3 MORE videos to address all of the individuals who poked holes in his logic (videos are: Poking Holes 1 through 3).

THEN, he asked all the commenters and YouTube viewers to look at all 4 videos and comment about what should be kept/expanded/deleted to make an all-encompassing 10 minute video. And, if anyone has any specific critiques, then they can watch the MASSIVE number of appendices videos that he made. These are 12 series of videos (ranging from 1-7 videos each) that go IN DEPTH into various aspects of his argument. I have watched the vast majority of them, and you have to be impressed with this manâ€™s commitment to the message.

So, once you watch it, do with it what you will. But, you never know, you could help cause a world-wide change. And, who doesnâ€™t want to help save the world?

Here endeth the lesson.
